FESC Bringing Energy Solutions to Florida, the Nation and the World			
<div>The Florida Energy Systems Consortium (FESC) was created by the Florida State government to promote collaboration among energy experts at its 12 supported universities to share energy-related expertise. The consortium assists the state in the development and implementation of an environmentally compatible, sustainable, and efficient energy strategic plan. The legislature appropriated funding for research at five of the universities as well as support for education, outreach, and technology commercialization. The Consortium reports to and provides guidance on an as needed basis to the Florida Legislature, Executive Office of the Governor, and the Florida's Office of Energy housed in the Florida Department of Agriculture and Consumer Services.</div>		Download Brochure

Public Outreach: Fact Sheets, Videos, and Research Areas			
Fact Sheets	Videos	Areas of Research	
As part of our outreach effort, the FESC is continually expanding available online materials. Click here for publications from the Energy Education Library, located on the Florida Department of Agriculture and Consumer Services website.	Watch a series of videos designed to positively influence citizen's environmental conservation attitudes and behaviors.	FESC researchers focus on the following thrust areas. Within these areas are more specific research topics. Click on your topic of interest for more information, including FESC faculty expertise and the latest research news.

Testimonials

ARN "We heard about amber energy as they had worked with a number of our clients and realised significant savings for them. Smart buying, tax reclaims, new government initiatives, BRELLAM improvement, consumer education etc are how they can help deliver savings, depending on your current set up. They are good, smart guys who know their stuff!"
Commercial Director, Ark 4

Think energy efficiency when renting a home

• Comfort and keeping bills under control are key for renters • Check energy features of potential properties • Using home's CPC can be start of landlord engagement Potential tenants don't always apply the same level of scrutiny to their potential home as buyers. But when it comes to energy...

[Energy and water efficiency at home](#) [buying a home](#) [energy efficiency](#) [new home series](#)

Buying an energy efficient home

• Energy efficiency should be high priority when buying a house • Whether scaling up or downsizing, costs and comfort matter • What features should you look out for? Our guide offers some pointers When buying a home, there's a lot to think about – but that should be no excuse for ignoring energy...
